

CONSTRUCTION ELEMENT

BaseTec angle

Product Information

BaseTec angle - Cladding done the easy way

This product is very suitable due to its extraordinary versatility. BaseTec angles of all leg lengths and boxes can be made with standard milling. With additional milling the BaseTec angle can be made into a wide range of shapes even up to rounded off claddings.

Your advantages:

- Homogeneous surface
- No contraction if tiled on one side only
- High adhesion and tensile values
- Building material class B2 according to DIN 4102-1
- Resilient
- 100% resistant to acids/alkalis, resistant to mould
- High tile compressive strength
- Extremely low specific weight
- Can be repaired without major damage
- Easy to cut to size
- Delivered in the glued condition
- Special sizes and formats available on enquiry
- Rounded cladding also possible due to additional milling
