## Round & Wall System

## Product Information

### Round & Wall System - Adventure showers

Adventure showers are not only restricted to wellness areas; they are becoming increasingly popular in private households, too. Round and curved showers as well as shower elements with wall systems allow the easy design of shower landscapes and are a popular alternative to conventional shower partitions. Thanks to the dual-sided special coating of the side walls and the floor element, the immediate fitting of ceramic coverings is possible. A fittings panel is optionally available for the installation of fittings on site.

#### Your advantages:

- Barrier-free thanks to floor-level installation
- Suitable for wheelchairs, ceramic covering at least 5 x 5 cm
- Firm standing due to a gradient of only approx. 2-3% %
- 12 standard sizes in square, rectangular, round and curved shapes
- Very low dead weight
- Fittings panel freely positionable
- Reinforcement profile, matched to on-site situations
- Roof elements available with various surfaces (also designed for the mounting of lights)
- Optional footstep sound absorption
- Many different design options
- Excellent safety aspect due to higher installation of the water-bearing level
- Alternatively sealed, absolutely watertight
- Double-sided special coating for the immediate acceptance of ceramic or other floor coverings
- Groove formation for optimum binding to wet screed or for further processing with the BaseTec NF flooring board
- Special sizes and designs available upon request
- Integrated heat insulation
- Easy, time-saving and clean assembly
- Easy to install on finished floors without great expense
- Extensive assembly accessories
- 5-year warranty on leak-tightness

#### Accessories:

##### Round & Wall System Rapid

substrate block for height adjustment under the Round & Wall system, made of extruded polystyrene hard foam, double-sided special coating, with factory-made drain recess. Available to fit all sizes. Material thicknesses: 20, 30, 40, 50, 60, 80 mm

##### NF flooring board

NF flooring board for connection to the Round & Wall system; enables the watertight, dry finishing of floors. Easy, fast and safe processing is ensured by being equipped with groove and tongue. Size (L x W x H): 1250 x 600 x 40 mm, with 50 mm footstep sound absorption
