

# SHOWER ELEMENT

## HighTec Board

**STADUR**  
MADE IN GERMANY

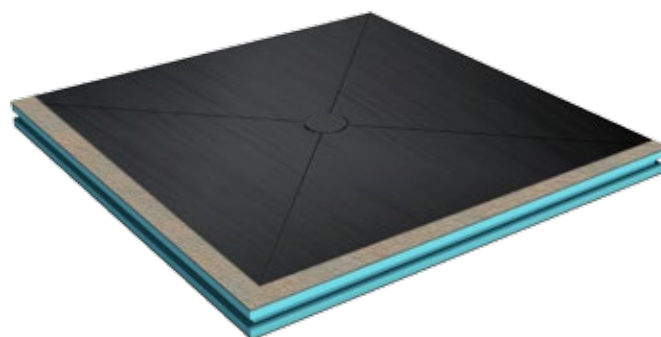

# Product Information

## HighTec Board - Complete shower tray with ceramic covering

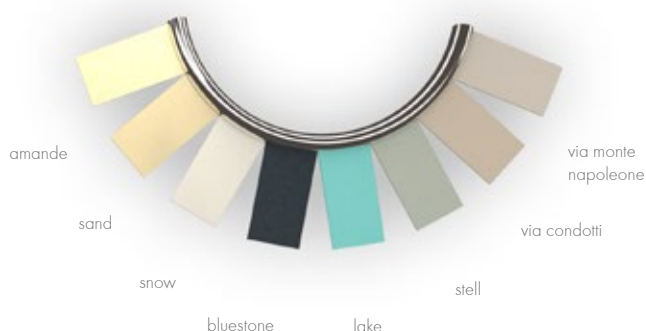

The superior-quality, skin-friendly ceramic surfaces have the excellent scratch resistance MOHS hardness 8. This is only exceeded by the hardness of a diamond. In addition the surface is resistant to aggressive liquids of all kinds. With four standard colours and 12 further colours, the exclusive surfaces offer individual creative space. A uniform image is achieved thanks to the factory-revised cover in the same ceramic design. You can set accents in your bathroom by the combination of large-size wall elements and floor coverings in the same look.

### Your advantages:

- Barrier-free thanks to floor-level installation
- Suitable for wheelchair use
- Firm standing due to a gradient of only approx. 2-3%
- 8 standard sizes in square and rectangular shapes
- Large variety of colours
- Joint colour matched to the surface
- Cover in uniform ceramic design
- Also available as Line Board (with channel drain)
- Extremely scratch-resistant
- Resistant to many aggressive liquids
- Surface material usable in the wall area
- Screed edge for transition to customer's ceramics

- Optional footstep sound absorption
- Alternatively sealed, absolutely watertight
- Groove formation for optimum binding to wet screed or for further processing with the BaseTec NF flooring board
- Special sizes and designs available upon request
- Sound insulation in the wall connection area due to factory-fitted standardised insulating tapes
- Factory-fitted sealing tape facilitates sealing in the wall area
- Integrated heat insulation
- Easy, time-saving and clean assembly
- 5-year warranty on leak-tightness

### Accessories:
